

America's Leader in Synthetic Overspray Media

ATI, America's Leader in synthetic overspray media, developed CS Media to provide a high-performing, cost-effective product for:

- excellent paint removal efficiency
- high paint holding capacity
- great applications flexibility

CS Media is an excellent alternative to traditional paper/poly and fiberglass medias.

It keeps stacks, motors, (and parking lots!) free of paint, and is an exceptional primary overspray media or 2nd stage product.

This 1" two-ply media is well-suited to a variety of production environments. CS Media is widely used throughout the general metal finishing industry, for wood finishing operations, by tier 1/2 automotive suppliers and by cost-conscious auto repair shops with high performance standards.

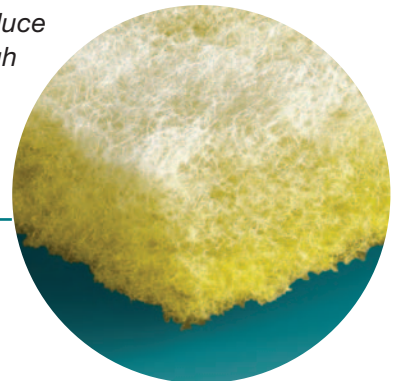

CS Media is effective on a wide range of commercial and industrial paints, including high solids, solvent-based and water-based paints and lacquers. Performance for the most common coatings type is:

Paint Type	Air Flow	Initial Static Resistance	Avg. Removal Efficiency*
High Solids	150 FPM	.08" WG	99.48%

* Independent lab tests results available upon request.

CS Media features graduated denier fiber construction, a high-efficiency back layer, and a face design engineered to depth-load both liquid and solid overspray, for highest holding capacity.

CS Media is manufactured to standards that produce a high integrity, high performance paint overspray product, roll after roll!

"Clean Air Solutions for a Perfect Finish"

CS Media is a cost-effective, durable media that *always* delivers high performance!

It is available in thirteen standard roll widths, pads, panels and multi-pocket bags. As a value-added service, ATI will perforate blankets to your booth size at no additional charge.

Standard panel sizes are available in these six face dimensions:

12X24	20X20
16X20	20X25
16X25	24X24

CS panels are also supplied in link panel form and made-to-order sizes.

CS Bags are manufactured with two and three pockets. CS Bags are available in 13 standard sizes and four depths. CS multi-pocket bags are also supplied in custom configurations to fit specific booth requirements.

Link Panels

CS Bags

Main Sizes:	# of Pockets	Main Sizes:	# of Pockets
20x20x12	2 and 3	24x24x12	2 and 3
20x20x15	2 and 3	24x24x15	2 and 3
20x20x20	2 and 3	24x24x20	2 and 3
20x25x12	2 and 3	12x24x12	1
20x25x15	2 and 3	12x24x15	1
20x25x20	2 and 3	12x24x20	1

We believe that ***no matter what your requirements for filter depth and service life,*** there's an ATI product that provides exactly the combination you need!

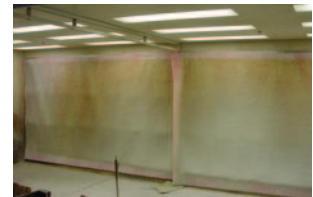

The **ATI Advantage:**

Less Labor, Less Changeout Downtime!

All ATI medias are cut to the exact dimensions of your booth to eliminate media waste.

Save time and dollars now by converting your pad-and-frame system to efficient pre-cut blankets.

Ask your local ATI representative how you can begin using the ATI blanket system to save valuable production time!
